

# Joncryl® HPD 196 MEA ap

## General

Joncryl® HPD 196 MEA ap is a high performance acrylic resin solution for pigment dispersion applications.

## Key Features & Benefits

High pigment concentrations  
Very good dispersion and ink viscosity stability  
Cost effective

## Chemical Composition

Styrene acrylic resin solution

## Properties

### Appearance

Yellow to amber liquid

### Typical characteristics

*(should not be interpreted as specifications)*

non-volatile	40.5 %
acid number (Nv)	200
density at 25 °C	1.08 g/cm <sup>3</sup>
glass transition temperature T <sub>g</sub> (DSC)	85 °C
pH at 25 °C	8.5
Viscosity at 25 °C	2,000-5,500 cps
Molecular weight (Mw)	9,200
Freeze-thaw stable	Yes
Total VOC	~7.82% wt

## Application

Joncryl® HPD 196 MEA ap is a solution of a mid-range molecular weight acrylic resin in water and mono-ethanol amine. This solution is specifically designed to disperse organic pigments at high concentrations without compromising ink stability. In addition, it allows the manufacturing of color concentrates with 35% or high pigment loading at very low viscosities.

Recommended for applications such as pigment dispersions.

Joncryl® 196 MEA ap TDS EN (04-2020)

### Safety

When handling this product, please comply with the advice and information given in the safety data sheet and observe protective and workplace hygiene measures adequate for handling chemicals.

### Note

The data contained in this publication are based on our current knowledge and experience.
