

# Efka<sup>®</sup> SL 3259

## general

slip and leveling agent

- non-reactive slip and leveling/wetting agent for printing inks, overprint varnishes, coatings and paints
- good compatibility with a broad range of resin systems

## chemical nature

organo-modified polysiloxane

---

## Properties

### physical form

clear to slightly hazy colorless liquid

### storage

Efka<sup>®</sup> SL 3259 should be stored in a cool and dry place.

### typical properties (no supply specification)

density at 20 °C (68 °F)	~ 1.00 g/cm <sup>3</sup>
Brookfield viscosity at 23 °C (73 °F)	~ 175 mPa.s
flash point	> 90 °C (194 °F)

---

## Application

Efka<sup>®</sup> SL 3259 is a solvent-free, organo-modified polysiloxane for use in printing inks, coatings and paints. Being compatible with a wide range of resins, it enhances excellent substrate wetting due to the reduction of the surface tension of the liquid film. Additionally, Efka<sup>®</sup> SL 3259 improves gloss, scratch resistance and leveling of coatings. It very efficiently reduces the coefficient of friction (COF) because Efka<sup>®</sup> SL 3259 accumulates on the surface of the cured film and thus increases efficiently the surface slip effect. Efka<sup>®</sup> SL 3259 is well suited for UV-curable formulations as well as solvent- and water-based applications.

### recommended concentrations

0.05 – 1.50% on total formulation

Efka<sup>®</sup> SL 3259 should be added at the grinding or let-down stages but may also be stirred in post-additive.
