

Rheovis[®] HS 1152

general

rheology modifier

- outstanding low-shear thickener and rheology-control agent for aqueous coatings

chemical nature

hydrophobic modified acrylic swellable copolymer emulsion (HASE) in water

Properties

physical form

white liquid (dispersion)

storage

Rheovis[®] HS 1152 should be stored in a cool dry place.

typical properties (no supply specification)

solid content	~ 40 %
density at 20°C	~ 1.073 g/cm ³
Brookfield viscosity at 25°C, 20 rpm	~ 5 mPa·s
pH	~ 3.2

Application

Rheovis[®] HS 1152 is an outstanding rheology-control agent for water based coatings to increase viscosity in the low-shear range and develops a pseudoplastic (shear-thinning) viscosity.

The polymer provides rheology-control through extensive swelling of a high-molecular-weight polymer in combination with a hydrophobic component.

This leads to outstanding sag-resistance for interior and exterior coatings where cellulose ethers can (partially) be replaced by Rheovis[®] HS 1152. In combination with polyurethane based rheology modifiers (HEUR) it provides excellent balance of sag resistance and leveling which is ideal for airless spray applications.

Rheovis[®] HS 1152 is most effective between pH 8 to 10. It offers the following benefits:

- low-shear thickening
- improved sag resistance
- outstanding efficiency
- for paints and plasters

recommended concentrations

1.0 - 3.5 % on total formulation

We recommend to determine the optimum level of Rheovis® HS 1152 by laboratory trials to achieve optimum performance.

Rheovis® HS 1152 can be added at any stage of the production process. Afterwards the pH should be checked again and adjusted to 8-10.

Rheovis® HS 1152 can also be mixed into polymer dispersions in the form of an alkaline solution. The solid content of the solution should not exceed 1% to allow easy handling. It is recommended to dilute the thickener with water and add alkaline whilst stirring. Check and adjust pH afterwards.

Depending on applications, it can be advisable to use Rheovis® HS 1152 in combination with other Rheovis® thickeners or cellulose derivatives in order to obtain the required effects.

Validity

This Technical Data Sheet is valid for all versions of the Rheovis HS 1152.

Safety

When handling these products, please comply with the advice and information given in the safety data sheet and observe protective and workplace hygiene measures adequate for handling chemicals.

Note

The data contained in this publication are based on our current knowledge and experience.
