

Dispex® Ultra FA 4488

general

dispersing agent

Dispex® Ultra FA 4488 is a universal dispersant for all kinds of pigments for both water- and solvent-based paint systems; especially developed for label-free colorants. It offers the following benefits:

- fine and stable dispersion of pigments and fillers
- development and stabilization of color shade
- easy adjustment of color shade
- eliminates haze, flooding & floating
- boosting efficiency of emulsifiers in pre-dispersed systems

chemical nature

alkylpolyalkoxylate, non ionic

Properties

physical form

amber liquid

storage

due to the high viscosity of Dispex® Ultra FA 4488, it is easier to handle when stored at room temperature. Temperatures below 15 °C could cause cloudiness and solidification, which is reversible upon heating.

typical properties

solid content	~ 99.5%
water content (ISO 4317)	~ 0.5%
pH-value (5.0% in water; 20°C)	~ 5.00 – 7.00

Application

Dispex® Ultra PX 4488 is recommended as dispersing and wetting agent for the formulation of VOC-free systems, particularly universal colorants. It has specifically been designed to be used in label-free colorants and paints which have to comply with eco-label standards.

Dispex® Ultra FA 4488 proved particularly effective in systems formulated with difficult-to-use pre-dispersed pigments (e.g., some phthalocyanine blue or green shades).

If used in universal colorants compatibility with solvent-based alkyd systems is significantly improved.

recommended concentrations

Calculation method for the required amount of active ingredient:

inorganic pigments	1 - 5% active on pigment
organic pigments	20 - 30% active on pigment
carbon black	30 - 60% active on pigment

Dispex® Ultra FA 4488 can be incorporated into the mill base or used as a post additive.
