

Dispex[®] Ultra PX 4525

general

dispersing agent

Dispex[®] Ultra PX 4525 is a universal dispersant for all kinds of pigments for both water- and solvent-based paint systems; especially developed for label-free colorants. Because of its chemical nature it provides excellent compatibility and color development in polar and unpolar paint systems. This results in:

- excellent color development in aqueous- and solvent-based paints
- higher pigment loading
- optimum color acceptance of the colorants in the base-paints

chemical nature

blend of amine- and acid-functional polymers

Properties

physical form

brownish liquid

storage

Dispex[®] Ultra PX 4525 should be stored in a cool and dry place. It is recommended to homogenize the product before use.

typical properties (no supply specification)

solid content	~91 %
density at 20 °C (68 °F)	~ 1.08 g/cm ³
acid value	~ 33 mg KOH/g
amine value, potentiometric	~ 16 mg KOH/g
Gardner color number	≤ 9

Application

Dispex[®] Ultra PX 4525 is recommended as dispersing and wetting agent for the formulation of VOC-free systems, particularly universal colorants. It has specifically been designed to be used in label-free colorants and paints which have to comply with eco-label standards. Dispex[®] Ultra PX 4525 can also be used as a post-additive (compatibilizer) to increase compatibility and color acceptance, especially in water-based and solvent based decorative paints.

recommended concentrations

Calculation method for the required amount of active ingredient:

universal colorants, inorganic pigments	5.0 – 10.0 % active on pigment
universal colorants, organic pigments	10.0 – 20.0 % active on pigment
base paints	0.5 – 1.5 % on total base paint

Dispex[®] Ultra PX 4525 can be incorporated into the mill base or used as a post additive.
