

Efka® FL 3670

general

flow and leveling agent

Efka® FL 3670, being well compatible with most solvent-based resins, is a leveling agent, a very effective anti-cratering agent as well as a flow control agent with minimized effect on stabilizing foam. The leveling efficiency is higher than that of Efka® FL 3770

chemical nature

fluorocarbon-modified polyacrylate

Properties

physical form

slightly hazy, colorless liquid

storage

Keep container tightly closed and in a cool place.

typical properties (no supply specification)

solids	~ 70%
solvent	alkyl benzene
density at 20 °C (68 °F)	~ 0.98 g/cm ³

Application

Due to its broad compatibility, Efka® FL 3670 can be used in most solvent-based liquid coatings to improve the leveling of the dry film with no negative impact on recoatability. It is designed to be used in:

- acrylic or polyester/melamine automotive OEM coatings
- two-pack PUR automotive refinish coatings
- polyester/melamine coil coatings
- two-pack epoxy and PUR compounds
- UV-curable wood coatings

recommended concentrations

0.1 - 0.5% on total formulation

Efka® FL 3670 can be incorporated at any stage during the production process
